

Appendix 5. Evaluation at the faculty level by TPMF includes evaluating the level of satisfaction of stakeholders (students, lecturers, education staff, alumni, and graduate users) with the service.

Evaluation at the faculty level by the Faculty Quality Assurance Team (TPMF) which includes evaluating the level of satisfaction of the academic community (students, lecturers, education staff, stakeholders towards

1. Management services for lecturers and students Ten

The manager of the Chemistry Study Program is considered very good and good (90 percent) on departmental governance or departmental management by lecturers and staff.

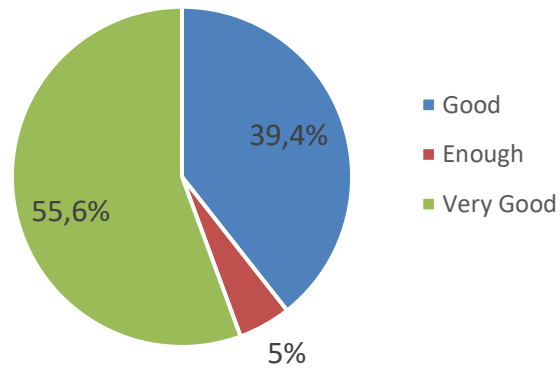

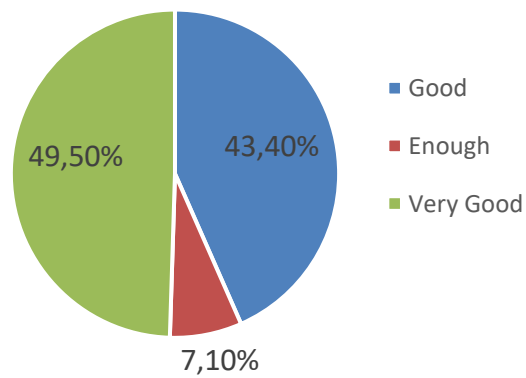

2. Chemistry study program services and the implementation of the educational process

The questionnaires were filled out by lecturers, students and staff. The results obtained 90 percent answered very well and well to all questions about the service education process

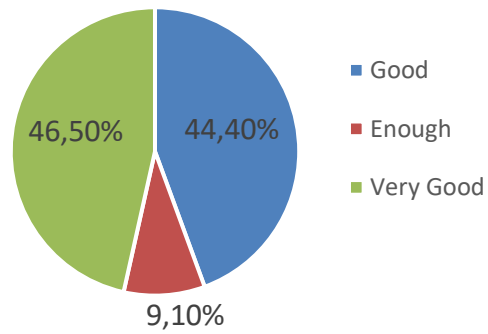

The ability of the Study Program Management Unit in the service and implementation of the educational process

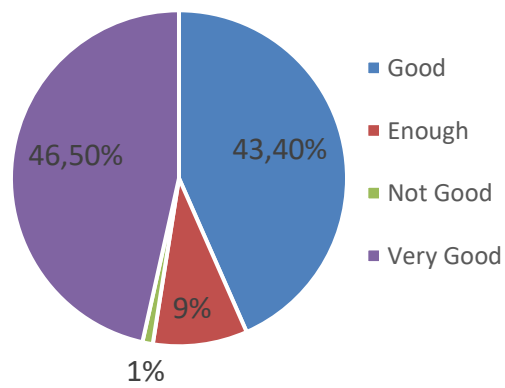

Ease of service delivery

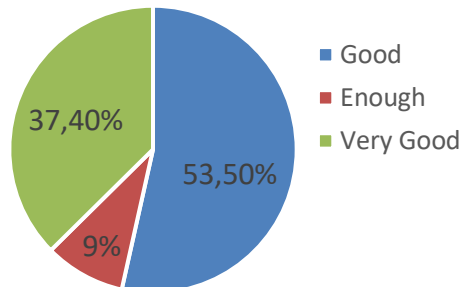

### Clarity of service process and education implementation

### The attention and care of officers in the service and implementation of the educational process

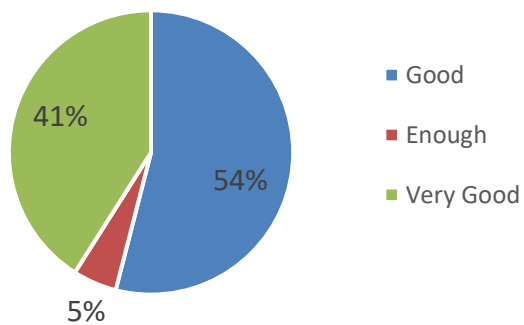

Availability of facilities and infrastructure in the implementation of the educational process

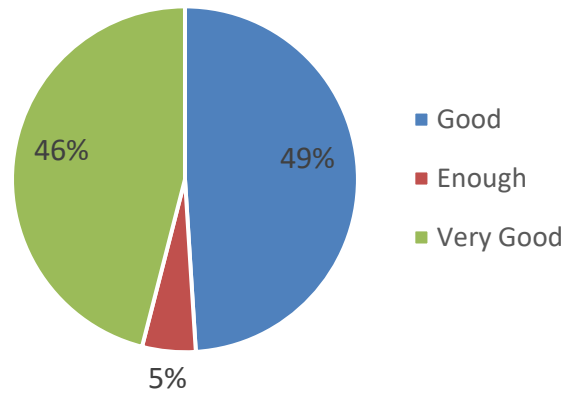

3. HR Development services by Chemistry Study Program by lecturers

Not different from Management services, the Management of Chemistry study program is rated by lecturers and staff as very good and good above 90 percent in the questions asked about the development of Chemical HR.

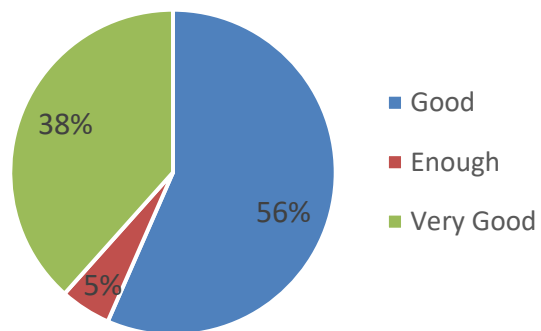

The ability of the Department of Chemistry in supporting services and SDM development

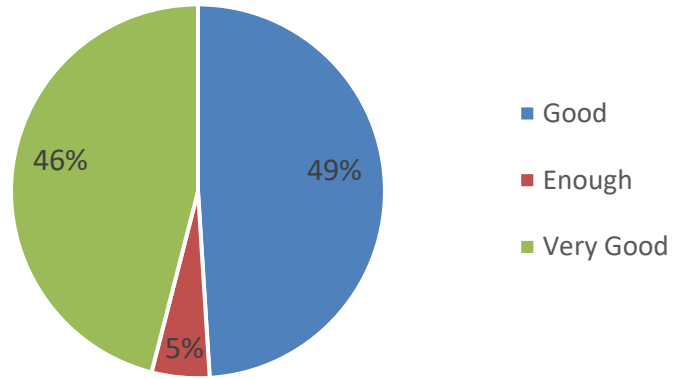

The will of the Department of Chemistry so that services and SDM development are good

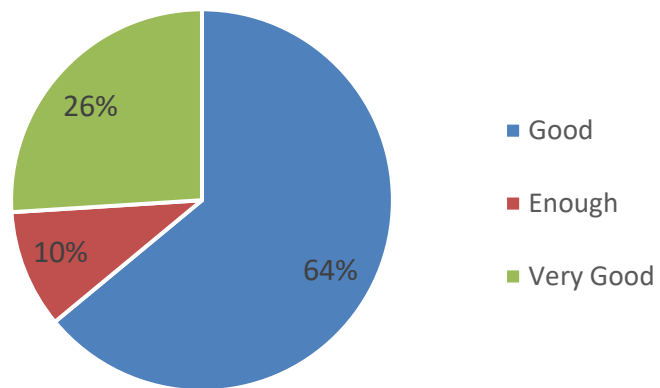

Service ensure and SDM development

Attention and management information in services and SDM development

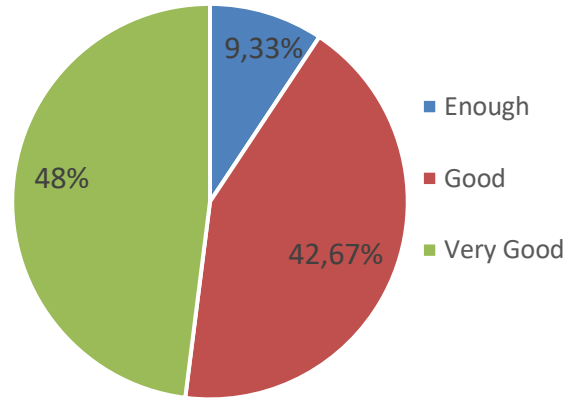

Adequacy of facilities and infrastructure in service and SDM development

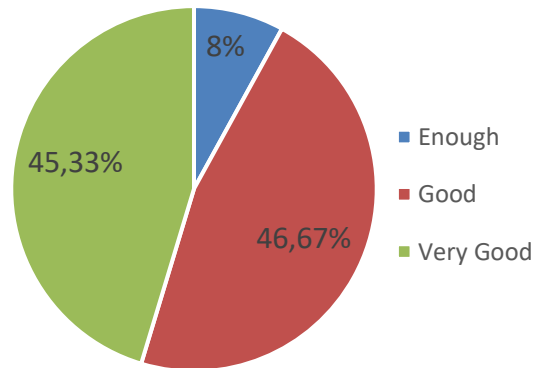

4. Satisfaction of Researchers and Community Service Actors and Partners with Chemistry Study Program Services Treatment

They rate very well and very well (above 90 percent) of research service and services:

### Ability of Study Program Management Units in Research Services

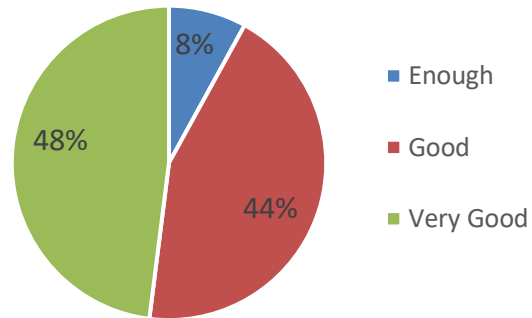

### Ease of Study Program Management Units in providing research services

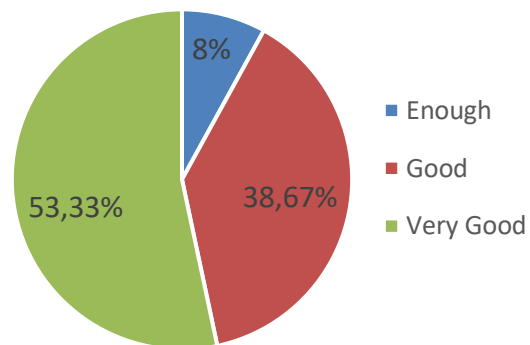

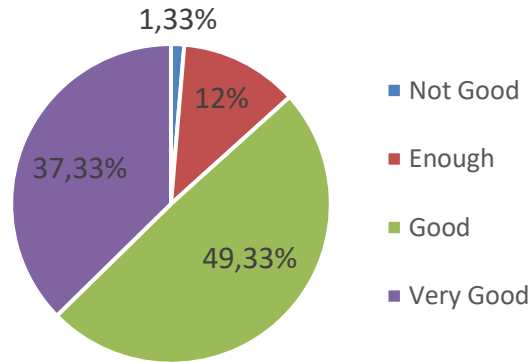

Explication of Study Program  
Management Unit in research service  
process

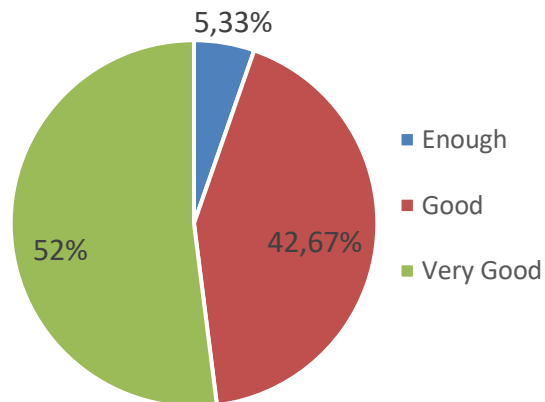

Attention and care of technical staff in  
management research process

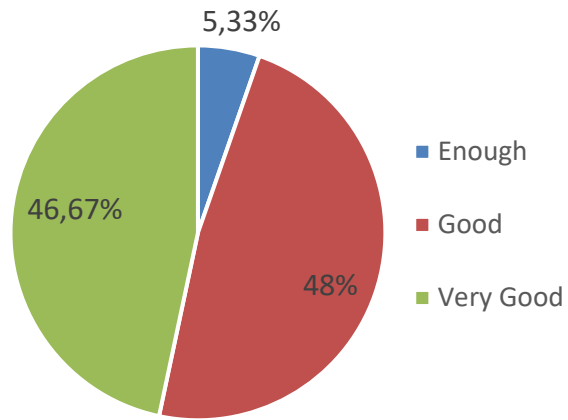

Assessment of researchers/partners on the sufficiency of providing facilities and infrastructure in research activities

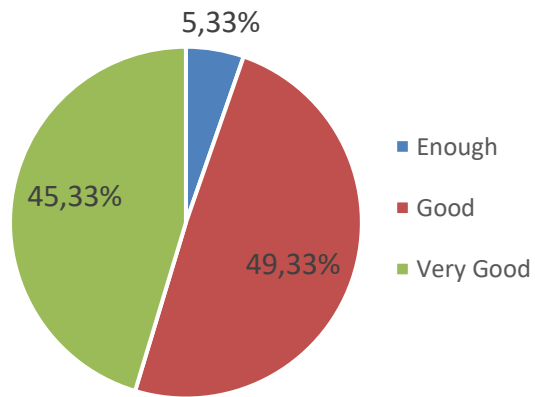

Ability of Study Program Management Units in Community Service

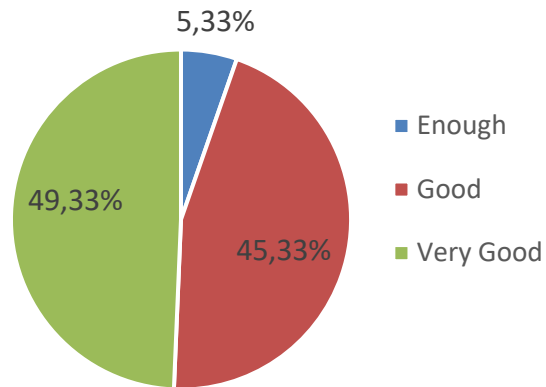

Ease of Study Program Management Units in providing treatment services

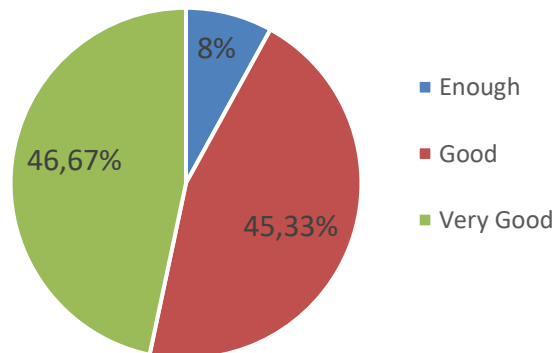

Explication of the Study Program Management Unit in treatment service process

The attention and care of the tending officers in the management of the service process

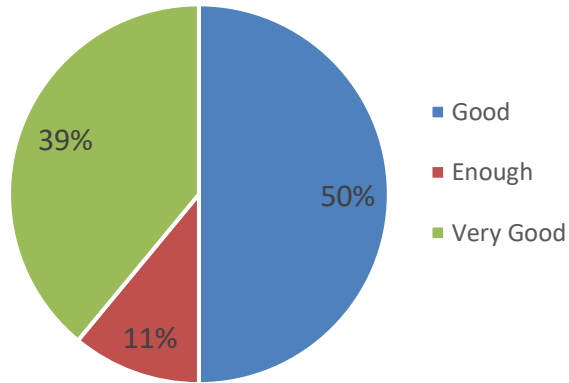

Assessment of service implementers/partners on the sufficiency of the Study Program Management Unit in providing facilities and infrastructure in service activities

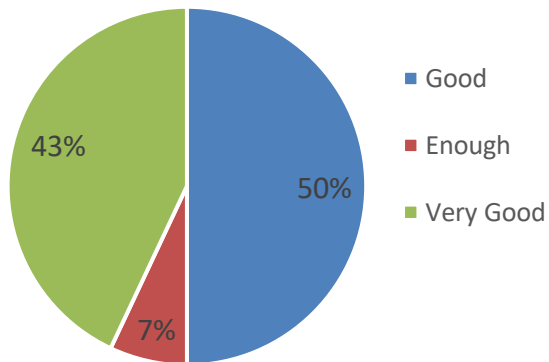

5. in Finance

The manager of the Chemistry Study Program was assessed by lecturers, students and staff as very good and good (90 percent more) in managing finances, including reporting transparency and questions related to financial management.

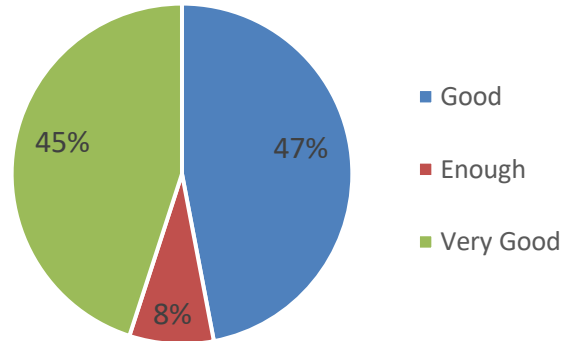

The ability of the Department of Chemistry in managing finances, facilities and infrastructure

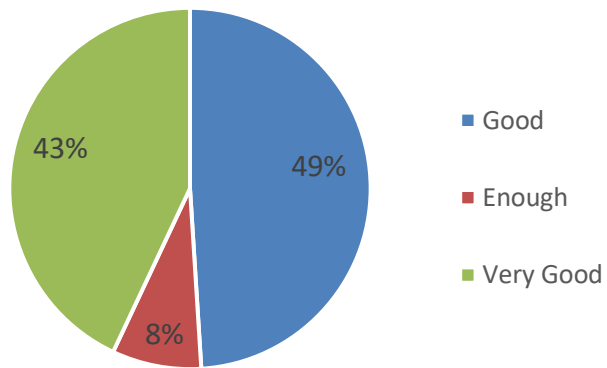

Purpose of the Department of Chemistry to make financial management, facilities and infrastructure accountable, efficient and durable

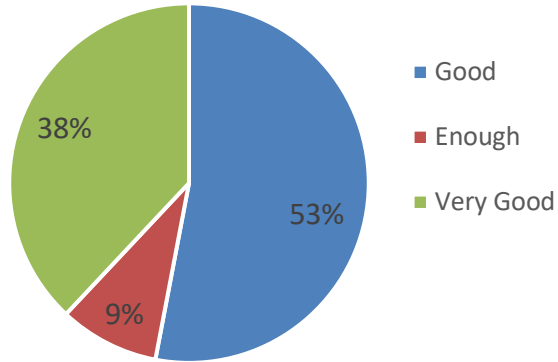

Guaranteed Security of Financial Management,  
Facilities and Infrastructure in adaptation with the  
rules

Management attention and convenience in  
financial management treatment

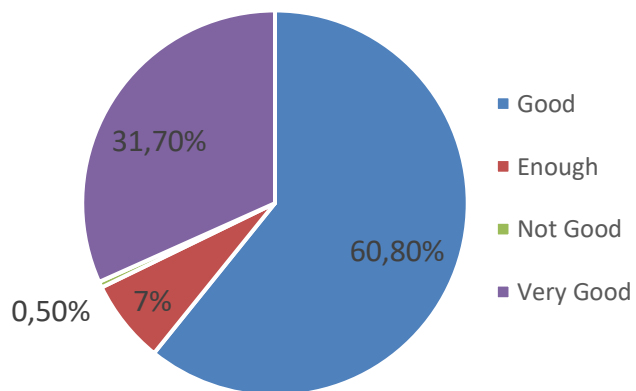

Adequacy of the availability of facilities and infrastructure in financial management

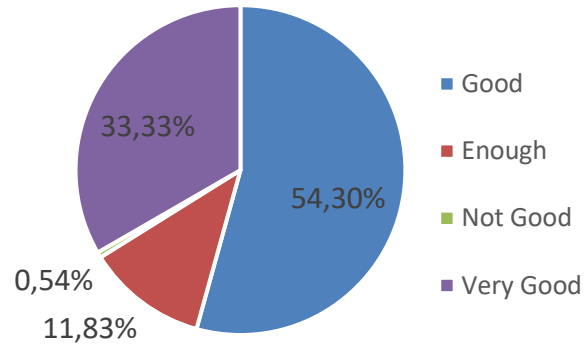

6. In terms of services to students, 90 percent considered the Management of Chemistry Study Program to be very good and good in providing services to educational and student activities.

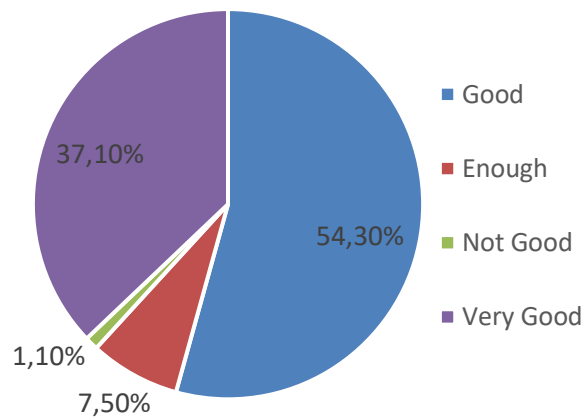

The ability of Chemistry Study Program in student treatment

The Purpose of the Chemistry Study Program to make treatment easy and fast

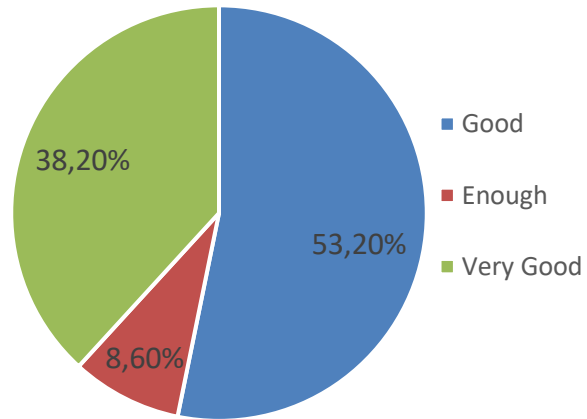

Assurance of student treatment according to the rules / procedures

### Management attention and friendliness in student treatment

### Adequacy of facilities and infrastructure in student treatment
